

E-Commerce Solution - Package Details

Unlimited Products and Catalogues - Templated system means you can easily add new products and catalogues without limit or restriction.

Import Functionality - If you have a wide range of products, you can easily manage your products using Excel. Make any changes and then quickly and easily import them into your online database.

Product Grouping - Display similar products (eg. Same product but different sizes) as one product, with different options.

Product Attributes - Add options to any product and even charge for these options (eg. A warranty or some other extra).

International Sales - Have the ability to sell overseas. Handles different currencies and taxes.

Automated Shipping - Have a choice of several different shipping options, from Australia Post to FEDEX. Simply includes weight and dimensions in your products and the automated shipping gateway will calculate the shipping charge. You can also create your own shipping options.

Drop Shipping - Automatically notify your Suppliers of any sales so that they can arrange shipping to the customer direct. Great if you act as an Agent or similar.

Payment Gateways - Have a choice of Payment Gateways already set up in your website (no additional programming). From Paypal and Google to E-Sec and Payment Express. Or you can even choose to "Process Offline" and use your existing EFTPOS facilities

Discounting Features - Have the ability to offer different forms of discounts (such as percent off, dollar off, free shipping etc) as well as set limits for them to apply. You can also offer general discounts or discounts specific to a Customer and Catalogue.

Get a Quote option - Have the option for customers to get a quote at the check out. Useful for large orders, or if you don't want to show prices.

Continues over leaf...

E-Commerce Solution - Package Details

Affiliate Programs - The ability to create links that your Affiliates can add to their websites promoting your products. When visitors click on the link to go to your site, your site will track any sales etc that they do. You can then offer commissions etc to your affiliates.

Gift Vouchers - Sell Gift Vouchers where the system will automatically track redemption until the full amount has been spent on your online shop.

Inventory Control - Manage your Inventory through the system. Set stock levels to receive email notifications at.

E-Products - You can sell E-Books etc, by simply uploading the PDF etc to the Product and the system takes care of everything else. Will email a link to download with the Invoice, which will only work after payment has been processed. You can also restrict number of downloads etc.

Related Products - Display related products to encourage customers to purchase additional products (eg. Socks with shoes etc)

Secure Zones - You can add a Secure Zone to this package, which allows you to restrict who sees the prices. You can also set it so each customer sees their unique prices.

In-Depth Reporting - Comprehensive reporting including Sales, Payments, Abandon Rates, Shipping Options Popularity, Discount Code Redemptions etc
